About Me

Senior Frontend Developer with 6+ years of experience building scalable, responsive, and user-focused web and mobile applications using React, React Native, Next.js, JavaScript, and TypeScript. Strong frontend background with experience in reusable component architecture, micro-frontend systems, REST API integration, and pixel-perfect implementation of Figma-based designs. Hands-on React Native experience gained in a professional production environment, contributing to mobile application features with a focus on performance, usability, and maintainable code. Additionally experienced in backend and fullstack development through freelance projects, including API development, database integration, and end-to-end feature delivery. Strong background in developing fintech products, admin panels, mobile applications, and internal business tools while maintaining clean, scalable, and performance-oriented application architecture. Adept at collaborating in Agile teams, contributing to architectural decisions, mentoring junior developers, and owning features from setup to production delivery.

Technical Skills

Frontend

- React, React Native, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS, BEM

State Management, Data Fetching and Forms

- Redux, Redux Toolkit, Zustand, React Context API, TanStack Query, Axios, React Hook Form, Formik, Yup, Zod

UI / Design Systems

- Reusable Component Architecture, Component-Based Development, Ant Design, Chakra UI, Bootstrap, Tailwind CSS, shadcn/ui

Animation and Interaction

- Framer Motion, ScrollMagic

Architecture and Performance

- Micro-frontend Architecture, Webpack, Module Federation, Code Splitting, Lazy Loading, Performance Optimization

Testing

- Vitest, Jest, React Testing Library

Backend, Databases and BaaS

- NestJS, Express.js, REST API, Prisma ORM, MongoDB, PostgreSQL, Supabase, Firebase

Tools and Collaboration

- Git, GitHub, Docker, Microsoft Azure, Jira, Agile/Scrum, Figma, Postman, Swagger

Education

- 2014- 2019

B.A. in International Relations (100% English Program)

Atilım University

Languages

- English - B2
- Turkish - Native

Experience

- **Senior Frontend Developer**

P-Tech Solutions

Mar 2023 - Jan 2026

- Contributed to the development of fintech products including Merchant, Cards, Wallet, Campaign, and mobile applications.
- Took an active role in frontend and mobile projects from initial setup and architecture planning to implementation and delivery.
- Owned the frontend development of the Merchant project, leading its implementation and ongoing enhancement process.
- Developed web and mobile applications using React and React Native, alongside Sass/SCSS Modules, Redux Toolkit, Ant Design, and Axios.
- Built reusable UI components, contributed to architectural decisions, and developed internal npm packages to improve consistency, scalability, and maintainability across projects.
- Implemented pixel perfect and responsive user interfaces based on Figma designs, ensuring consistent user experience across different screen sizes and devices.
- Integrated multilingual support with i18n and connected multiple applications through Module Federation to support a micro-frontend architecture.
- Mentored junior frontend developers and shared best practices in reusable component development, code quality, and frontend architecture.
- Participated in Agile/Scrum processes including sprint planning, daily stand-ups, sprint reviews, and retrospectives, while also contributing to Docker and Microsoft Azure-based development and deployment workflows.

- **Frontend Developer**

Marti Technologies

Nov 2022 - Mar 2023

- Contributed to the development of the company's admin panel from scratch as part of the frontend team.
- Developed frontend modules using Next.js, TypeScript, Sass/SCSS, and BEM methodology.
- Integrated REST APIs using Axios to support application workflows and data exchange.
- Managed application state with Redux Toolkit to maintain scalable and predictable frontend architecture.
- Built user interfaces with Ant Design and developed reusable UI components to improve consistency and maintainability across the product.
- Collaborated with team members in an Agile/Scrum environment to deliver features across sprint cycles.
- Participated in sprint planning, daily stand-ups, sprint reviews, and retrospectives throughout the development process.

- **Frontend Developer**

Maykim Group

Jan 2020 - Nov 2022

- Served as the sole Frontend Developer for internal company panels used in daily business operations.
- Designed and implemented user interfaces from scratch in Figma without pre-defined designs.
- Developed a large-scale internal management application covering order management, stock management, dealer management, and customer management processes.
- Built responsive and mobile-friendly interfaces to support active usage across desktop and phone devices.
- Integrated REST APIs and implemented frontend workflows for multiple business-critical modules.
- Used React, CSS, Chakra UI, Ant Design, Bootstrap, and Redux Toolkit to develop and maintain application features.
- Built reusable UI components to improve development efficiency, consistency, and maintainability across modules.
- Applied semantic HTML and clean code principles to support scalability and code readability.
- Contributed to the enhancement and ongoing development of the company's e-commerce website.
